

Fairway's monthly landscape report for March 2017

Work performed

- *Fertilization and insecticide of grass and shrubs
- *Fungicide treatment where needed
- *Liquid fertilized palms with a special chelated palm blend
- *Weeds sprayed in the turf areas
- *Weeds sprayed in shrub beds
- *Trimmed bushes and shrubs and palms under 15 feet in overall height

We noticed that many lawns and shrubs were not doing well do to lack of water. We suggest hand watering to keep things alive outside of regular irrigating until we get into rainy season. Remember these plants are living organisms and require just like a pet.

Please remember that all of our products that we apply need and require adequate water to work properly!

We appreciate your business. Please let us know if you have any questions.
